can chevron find you during an emergency?

Chevron's safety plan for wide-scale emergencies (such as severe weather, natural disasters and other unexpected scenarios) includes accounting for employees and telling you when it's safe to enter your work facility. The Chevron Employee Emergency Line (CEEL) is a critical component of this process.

Update your emergency contact information.

Go to [My HR](#), click [Workday](#), select **Personal Information**, and then select **Change Emergency Contacts**.

Also, go to [People Finder](#), click on *self service* and under *personal profile* update **Emergency Notification Information** as needed.

Save the **Chevron Employee Emergency Line (CEEL)** number in your contacts: **1-800-334-3963**.

Save the CEEL website address:
hr.chevron.com/ceel.

Review your information in the *Before an Event* section of **CEEL**. Specify your dependents and any special ongoing needs.

After an event, when you are in a safe place, **report your status once via any CEEL channel**.

Call the **Chevron Emergency Newsline** at **1-888-281-4747** to check the status of your Chevron work facility.
